Boca Raton, FL 33487

DEAR JRG PARTNERS,

I have recently begun looking for a new employer and a new place for my family to live. I offer the following highlights of my experience:

- BS Mechanical Engineering, MS Biomedical Engineering
- 9 years professional experience (not counting internships or campus labs)
- Design Excellence Black Belt
- Leadership Experience
 - Up to 4 direct reports
 - 3.5 years of project management experience
 - Significant ecclesiastical leadership responsibilities for small and large groups
- Cradle-to-grave new product development experience
- Lead sustaining engineering efforts for entire segments of DePuy-Synthes' portfolio

If my experience aligns with any of the positions that you are looking to fill, I would love to discuss these opportunities. I'm actively looking for engineering leadership roles, in product development, sustaining engineering, business development, product management, and potentially other areas.

Thank you,

Jonathan Bitter
