

Hello!

I am seeking executive level opportunities that encompass at least one of the areas listed below.

1. Translational medicine/sciences; including biomarker discovery and development strategies
2. Bioanalytical: PK, PD, Immunogenicity
3. Method development and validation: IVD and non-IVD
4. GxP CRO management and oversight; GLP/GCP/CLIA technical auditing
5. Execution of early phase clinical trials
6. Biopharma/pharma drug discovery
7. CLIA clinical chemistry reference labs; laboratory diagnostics
8. Complete understanding of GLP/GCP/ISO/OECD/CLIA/QA compliance
9. Hands on experience with the following laboratory technologies/instrumentation: HPLC, Lc-MS/MS, MALDI-TOF mass spec, Raman spectroscopy, microscopy, immunocytochemistry, FACS and multi-channel flow cytometry, hematology/immunology, clinical molecular diagnostics; targeted next generation sequencing; proteomic and genomic profiling; ligand-binding assays; enzymatic assays; in silico assay development tools (machine learning)
10. Any exceptional executive-level opportunity in the life sciences

Thank you in advance for your time!

Jennifer Ohayon, PhD
